

WORLD SUSTAINABLE DEVELOPMENT OUTLOOK 2013

Sustainable Development: New Multi-Disciplinary Approaches and Methodologies

World Sustainable Development Outlook series is developed to provide an overview of sustainable development and why it is important and to provoke forward thinking on the development of a more coherent approach to solving global problems related to sustainability. In doing so, a holistic approach is used to critically examine the inter-relationship between the natural, the governmental, the economic and the social dimensions of our world and how science and technology can contribute to solutions.

Outlook 2013 is a truly global source book reflected in the varied national and cultural origins of the contributors as well as the topics and case studies covered. This volume includes selection of the best papers presented during the 11th International Conference of WASD held in London School of Economics and Political Science (LSE), London, UK in the period 2-4 September 2013.

The main parts of the book are:

- Sustainable economic development
- Climate change and the environment
- Public policy and development
- Science technology and innovation management
- Knowledge management and ICTs
- International business and entrepreneurship
- Finance and accounting
- Services research
- Transportation research
- Public Health
